WORK EXPERIENCE

Frontend Developer
Nestech ⬈

09/2021 - Present　　　　　　　　　*Syria (Remote)*

- Converted design into high-class frontend web applications with the help of the quasar framework.
- Engaged in daily scrum meetings with our 5 members' team to optimize the development process.
- Helped to overcome deadlines with 3+ responsive high quality web applications.
- Worked on internal company mobile applications using flutter framework.
- Saved 20% of company time in creating a single module unit by reducing wasted time on re-writing boilerplate code to initiate the module structure by scripting the process using js and node.js.

Mobile Application Developer
Badinan Soft ⬈

12/2020 - 09/2021　　　　　　　　　*Iraq (Remote)*

- Implemented high-quality mobile applications with flutter and native android java for company-existed order system.
- Created a TV-oriented design video stream android native app using leanback library.
- Created company-base-package to reuse shared logic and style across different apps to gain more control and flexibility and reduce multi-file changes if needed.

Mobile Application Developer
Qlevar

07/2020 - 08/2021　　　　　　　　　*Germany (Remote)*

- Implemented and updated application modules under the direction of Senior Software Developer.
- Efficiently translated client requirements into application designs and system requirements.
- Managed tasks distribution within the team using Jira software.

EDUCATION

Master of Web Scince
Syrian Virtual University

01/2021 - Present

Bachelor of Informatics Engineering Department of Software Engineering
Tishreen Unviersity

06/2016 - 06/2021

SKILLS

Flutter　Dart　Bloc & Cubit　Provider　Android　Javascript　Vue.js　Vuex　Quasar　HTML　CSS　git

PERSONAL PROJECTS

TasQment ⬈
- Transformed the design of the application into a well-structured mobile application.
- Implemented SSO, 2fa, and chat system in the project.
- Upload the Mobile app to google play as a test release.
- Stack: Vue.js, Element UI, Vuex, SortableJS, PHP, Laravel, Dart, Flutter, Firebase, Pusher.

Qlevar ⬈
- led the process of converting the design into actual codebase using flutter framework in web base platform.
- attended the scrum meetings with product owner to convert the spoken language into user stories.
- Implemented a real-time server communication connection using signalR between the dashboard and the user app.
- Stack: Flutter, Dart, Provider, Getx, Asp.net, SignalR.

INTV+
- Implement TV-oriented design for android mobile application using leanback library.
- Stack: Java, leanback library, Firebase.

Badinan Shipping ⬈
- Implemented local package to help other apps which depends on it to easily access shared logic and company theme.
- translated the system structure decisions and contributed to the modular structure used in the application.
- Created a node server using Express JS to track the driver location using Socket IO and integrating it with the mobile flutter app.
- Stack: Flutter, Dart, Laravel, Express, Node.js, Firebase, Lifecycle:extensions.

ACHIEVEMENTS

Won 3rd place in Tamayuz competition
Participated in the "Encouraging Arabic content to use digital transformation tools" category.
